

Mass Audubon Education Department

Teacher Professional Development

Investigating Organisms

**Tuesdays: March 17, March 31, April 14, April 28, May 12, and May 26: 4:00–6:30 pm at
Broadmoor Wildlife Sanctuary, Natick**

Follow a life science strand from Kindergarten through grade 8 to see how understanding builds about organisms. Using hands-on explorations of the sanctuary, in-class activities and lessons for students, and research-based science education pedagogy from UC Berkeley's BEETLES project, participants will discover how to engage students with local plants and animals. Each class will also include practical assignments where you apply skills.

Members: \$245 Nonmembers: \$305
